

Thermal Server System

Why choose the Thermal Server System?

- Its narrow, attractive brewer will fit almost anywhere.
- Available in either plumbed-in or pour-over models.
- Brewer features a black powdercoat finish for long-lasting durability.
- Coffee stays hot and fresh in the server for up to six hours.
- The fully portable server is easily transported to remote locations.
- A flow-through lid prevents heat loss and keeps taste at a maximum.
- Plumbed-in brewing system features hot water tap for tea, instant soup or hot chocolate.
- A choice of delicious coffee blends and brands.

Great taste and convenience too!

With a brewer that makes up to 3.9 gallons of delicious coffee an hour, this system is sure to keep up with your coffee-drinking demands. Plus, the fully portable servers can be moved to any location.

Coffee - the way it was meant to be.

Café-quality flavor, wherever you want it, whenever you want it. Whether it's in your office, business, store or cafeteria, Thermal servers keep a variety of coffee flavors tasting hot and fresh for up to six hours.
